

Success cases by industry

Technology

Customer:

Service rendered:

Simultaneous interpretation and translation of legal and technical documents.

Context

SAS Institute is a leading analytics multinational that provides solutions and services for innovation, artificial intelligence and big data management.

Its experts are generally invited from the United States who travel constantly to close new negotiations with their customers, give workshops and trainings to other employees.

Challenge

Adhere to the legal and specialized language of anti-fraud systems for banks, as well as the technicalities of artificial intelligence and management of large volumes of data.

Testimony:

Sandra Milena Hernández, Business Administrator, Regional Marketing Manager SAS Institute.

She recommends Interact Group for "caring about understanding our business so that the quality of each translation is relentless." She highlights "Feeling part of my work team so as not to look like an outsider but rather active members of the results."

Achievement

Loyalty and constant work from 2014 to date.
